SUMMARY

Full-stack engineer with seven years of experience building web platforms with Java, Spring Boot, React and TypeScript, focused on reliable APIs and accessible interfaces.

SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL
Frameworks: Spring Boot, React, Node.js, Express
Data: PostgreSQL, MySQL, MongoDB, DynamoDB
Cloud and tooling: AWS, Docker, GitHub Actions, CI/CD, Git, Linux
Testing: JUnit, Mockito, Jest, Playwright

EXPERIENCE

Senior Software Engineer, Northwind Systems (2022 - Present)
Led a team of four building a REST API platform on Spring Boot and PostgreSQL deployed to AWS.
Introduced CI/CD with GitHub Actions and Docker, cutting release time from days to hours.

Software Engineer, Contoso Labs (2019 - 2022)
Built React and TypeScript dashboards consumed by internal analytics teams.
Wrote integration tests with JUnit and Playwright to stabilise releases.

EDUCATION

B.S. Computer Science, Riverside University (2018)

PROJECTS

JobLens - job search platform built with React, Spring Boot, PostgreSQL and Docker
Open-source REST client - TypeScript library with full test coverage

CERTIFICATIONS

AWS Certified Developer - Associate
Oracle Certified Professional, Java SE
